V INTERNATIONAL SCIENTIFIC CONFERENCE
"LANGUAGE IMAGES: LINGUOCREATIVE SYMBOLS
OF ETHNOCULTURAL SPIRITUALITY",
dedicated to the 75th anniversary of the Honored Scientist of the Russian Federation,
Doctor of Philology, Professor
NIKOLAY FYODOROVICH ALEFIRENKO
September 17-19, 2021

Location of the conference
BelSU
308015, Russia, Belgorod, Pobedy st., 85
bldg. 12th, 10th floor (plenary session);
308007, Russia, Belgorod,
Studencheskaya st., 14 (breakout sessions)

Dear colleagues!

We would like to invite you to participate in International Scientific Conference **«Language images: linguocreative symbols of ethnocultural spirituality»**, which is to be held on September 17-19, 2021 by Institute of Pedagogy at Belgorod State National Research University, organized by the Department of Russian Language and Russian Literature.

We hope the conference will offer an excellent opportunity to exchange ideas and views for researchers and practitioners on problems of language images.

Breakout sessions:

1. Language image as a verbal and cogitative category

1.1. Correlation of the concepts "image" and "language image" in cognitive science;

1.2. Language images generated by direct and indirectly derived nomination.

2. Lexical means which express language images

3. Phraseological image as a category generated by linguocreative thinking

3.1. Phraseological image and discourse (communicative event, communicative category);

3.2. Phraseological image and context.

4. Language images and their status in the literary text

5. Language images and their interpretation in language education

Program Committee

Harry Walter, Doctor of Philology, Professor (Ernst Moritz Arndt University, Germany, Greifswald), Chairman of the Commission for Slavic Phraseology of the International Committee of Slavists, Chairman of the Program Committee;

Nikolay F. Alefirenko, Honored Scientist of the Russian Federation, Doctor of Philology, Professor (Belgorod State National Research University, Russia, Belgorod), Deputy Chairman;

Valery M. Mokienko, Doctor of Philology, Professor (St. Petersburg State University, Russia, St. Petersburg), Deputy Chairman;

Włodzimierz Wysoczański, Doctor of Science, Professor, Institute of Slavic Philology, Wroclaw University (Poland, Wroclaw), member of the Program Committee;

Stefka Georgieva, Doctor of Philology, Professor, Faculty of Philology, Plovdiv University (Bulgaria, Plovdiv), member of the Program Committee;

Andrea Grominova, Associate Professor, University of Ss. Cyril and Methodius (Slovakia, Trnava), member of the Program Committee;

Maral B. Nurtazina, Doctor of Philology, Professor, Faculty of Philology, L.N. Gumilyov Eurasian National University (Kazakhstan, Nur-Sultan), member of the Program Committee;

Lyudmila Stepanova, Doctor of Philology, Professor, Faculty of Philosophy, Olomouc University (Czech Republic, Olomouc), member of the program committee;

Oleg Fedosov, Doctor of Philology, Professor, Department of Slavic Studies, Institute of Slavic and Baltic Philology of the Eötvös Loránd University (Hungary, Budapest), member of the program committee.

Organizing Committee

Oleg N. Polukhin, Rector of the Belgorod State National Research University, Doctor of Political Science, Professor, Chairman of the Organizing Committee;

Victoria B. Tarabaeva, Director of the Institute of Pedagogy, Belgorod State National Research University (Russia, Belgorod), Doctor of Social Sciences, professor, Deputy Chairman;

Andrey I. Papkov, Dean of the Faculty of History and Philology, Belgorod State National Research University (Russia, Belgorod), PhD in History, Associate Professor, Deputy Chairman;

Irina I. Chumak-Zhun, Head of the Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), Doctor of Philology, Professor, Deputy Chairman;

Svetlana A. Kosharnaya, Doctor of Philology, Professor, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Elena G. Ozerova, Doctor of Philology, Professor, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Larisa I. Plotnikova, Doctor of Philology, Professor, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Natalia N. Semenenko, Doctor of Philology, Professor, Department of Philology at "BelSU" Stary Oskol branch, member of the Organizing Committee;

Daria A. Cheremokhina, PhD in Philology, Associate Professor, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Gayane Y. Maltseva, PhD in Philology, Senior Lecturer, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Alina V. Duplyakina, assistant, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Anna S. Titova, assistant, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), member of the Organizing Committee;

Kira K. Li, PhD in Philology, Associate Professor, Department of Russian Language and Russian Literature, Belgorod State National Research University (Russia, Belgorod), conference coordinator, executive secretary of the conference.

Registration and conference fee

Participants should fill out the registration form on the conference website http://lansym.bsu.edu.ru/lansym/to-participate/

The authors of scientific papers must submit their articles in English via online-form. All articles are peer-reviewed and checked for plagiarism. The fee for editorial and publishing services will not exceed 10,000 rubles.

Bank details for payment of the registration fee will be sent to the participants after reviewing and approving the material.

When making a payment, BE SURE to specify the code phrase "Языковой образ" ("Language image").

Requirements for the publication

1. Article metadata:
• full title of the article;
• full name of the author (if there are several authors, then information is given for each author);
• academic title, academic degree, position;
• place of work: department, faculty, name of the university;
• city, country;

- work address with zip code;
- work phone number;
- e-mail;
- grant information (if available).

2. Technical requirements for the text.
- The recommended volume of the text as a whole, including all structural parts is at least 20,000 printed characters (including spaces). Times New Roman font, single spacing, 14 size, paragraph 1.25 – automatically set. All margins are 2 cm each; width alignment; portrait sheet orientation.
- The word limit for the abstract is 200-250.
- The minimum percentage of uniqueness according to the Anti-Plagiarism system is at least 85%.
- Tables are placed in the text of a scientific article indicating the numbering and references to the numbered table in the text. Each table should have a title and an indication: "compiled by the author, by the authors".

3. Structure of the article. The text should be divided into parts, the headings should be signed:
Abstract
Keywords.
Introduction.
Materials and methods.
Results.
Discussion.
Conclusions.
References.

SAMPLE DESIGN OF THE TEXT OF THE ARTICLE
Title (bold in the middle)*

Ivan I. Ivanov
Doctor of Philology, Professor,
Professor of the Department…
… State University
Belgorod, Russia,

tel. number
E-mail: …@mail.ru

Abstract:
Keywords: ….

Introduction. Text of the article. Text of the article. Text of the article. Text of the article.

Materials and methods. Text of the article. Text of the article. Text of the article. Text of the article.

Results. Text of the article. Text of the article. Text of the article. Text of the article.

Discussion. Text of the article. Text of the article. Text of the article. Text of the article.

Conclusion. Text of the article. Text of the article. Text of the article. Text of the article.

References. Square brackets are used inside the text for the design of links: [Petrov 2019: 45].

Requirements for the references

The total number of sources is 15-20, while at least 50% of them must be foreign. At least 30% of the sources must have been published within the last 5 years. The references are placed at the end of the article in alphabetical order.

When specifying sources, a full description of information about the author, the place and time of publication, full data about the journal and other publication format is required: the author's first and last name, the year of publication, the title of the article, the title of the journal, volume / number / issue, pages.

If the source is electronic, an active link to the material with an access code is indicated in the list of references.

For sources in English:
Gallo, J., Alefirenko, N. F. (2020).Text Linguistics: Traditions and Perspectives. In: Philological Class. 2020. Vol. 25. No. 3, pp. 23–38.

For sources in Russian:
Author A. A., Author B. B., Author C. C., Author D. D., Author F. F. *Transliteration Title of Book* [Title of Book in English]. – Name of City, 2005. – 200 p. (in Russian).

COMMENTS FOR AUTHORS ON THE ARTICLE STRUCTURE

1. The title of the article. In the title, it is preferable to use the main key concepts (words) of the publication topic, the title should include no more than 10-14 words (including conjunctions), the use of abbreviations (except for permissible international ones) is prohibited in the title.

2. Abstract. Abstract structure: a brief description of the research objectives, methods, research material, results achieved, brief conclusions (possible indication of practical application). The volume is 200-250 words.

You can use the following clichéd phrases:
This article discusses the problem…
The article is devoted to the phenomenon…
Special attention is paid to…
The article analyzes…
The author concludes…
The author focuses the main attention in the work on…
The characteristic features are highlighted and described…
The article reveals the features…
Based on the study … it is established…
The article summarizes the approaches to (to) … and reveals …
The article introduced into scientific circulation…
The author proposed…
The results can be used … (by whom) in … (where)

3. Keywords. The number of keywords is from 5 to 10. Keywords should reflect the topic, material, scientific field, object and subject of study. Recommendations:
- basic (commonly used) terms should be used;
- polysyllabic words and constructions should be avoided.

4. **Introduction.** The following items should be present in the Introduction:
- a brief description of the purpose of the study, the topic of the study and the scope of application;
- literature review, where it is required to indicate general research trends in the chosen field, existing contradictions in theory, methodology, practice or research conclusions, "white spots" in research or scientific schools, prospects for the development of the topic; the latest academic sources (possible reference to them or citation);
- the position of the author (justification of the criteria that were applied for the analysis and selection of literature, research material, methods of analysis);
- confirmation of the relevance of the study;
- author's achievements reflected in the article: filling gaps in science and practice; using new data; developing a new methodology, etc.

5. **Materials and methods.** For theoretical research, it is recommended to substantiate and describe the methodology that was used to obtain the results, and the specific methods used in the work. **For experimental studies**, it is necessary, among other things, to give a detailed description of the experiment, methods and equipment that were used.

6. **Results.** Review of all the results of the study. The general requirement is clarity and consistency of presentation, the use of general phrases should be avoided; **the results should correspond to the stated goals and objectives of the article**; it is necessary to clearly describe the conclusion, idea, concept or method that the author came to as a result of the research. In this section, you should minimize the use of sources and focus on your own observations and results.

7. **Discussion of the results** is the main part of the article. The analysis and explanation of the course of the research and its results are carried out, and the place of the results obtained during the research in scientific theory and practice is determined. It is necessary to compare the results obtained in the article with the results of research by other authors. Having considered other scientific concepts, determine the initial positions, the essence of the research and the results obtained. It should also reflect the assessment of the reliability of the results obtained and their comparison with other people's existing results. The volume of the section is 4-5 pages of printed text.

8. **Conclusions.** The results that were explained in the discussion are presented in a concise and systematic form. Conclusions should be a concise description of the main part of the article. The main task of the conclusions is systematization. It indicates the practical and scientific value of the study, possible areas of application, and the prospect of research. This is a summary of the work done, a key conclusion or a list of the main conclusions.

9. **References**. The list must contain at least 15 sources (including sources of factual material), of which at least 50% are in a foreign language. It is recommended to use at least 30% of current works (published in the last 5 years). The advantage will be the use of articles published in the Scopus and Web of Science databases over the past 5 years.
